Dischi Frizione

I kit frizione ADIGE® derivano da una lunga esperienza acquisita in più di 50 anni di collaborazione con le più importanti Case motociclistiche mondiali e con i Team ufficiali che partecipano ai campionati del mondo delle varie discipline e sono il risultato delle ricerche del reparto R&D ADIGE®.

Ogni materiale d'attrito ADIGE® è studiato e verificato per l'applicazione specifica ed è disponibile in kit realizzati per il modello specifico per il quale viene proposto. Tutti i materiali d'attrito sono formulati, sviluppati e prodotti direttamente presso i nostri stabilimenti e vengono controllati in tutte le fasi del processo in accordo a severi standard qualitativi.

La gamma di dischi frizione ADIGE® include i seguenti materiali di attrito:

Friction Plates

The ADIGE® friction plate kits are the result of the experience acquired through more than 50 years of cooperation with the most important motorcycle manufacturers and factory teams competing in the World Championships of various classes combined with the research of the ADIGE® R&D Department.

Each ADIGE® friction material is designed and verified for the application and available in sets realized specifically for the proposed model. All the friction materials are formulated, developed and produced in our plants and are strictly controlled in all phases of the production process.

The range of ADIGE® friction plates include the following friction materials:

BASE CARTA BAGNO D'OLIO:

Prodotti con un materiale a base carta per utilizzo a bagno d'olio, ottenuto utilizzando componenti high-tech selezionatissimi e dall'elevata stabilità termica, chimica e dimensionale, i dischi frizione ADIGE® sono perfetti per l'uso nelle competizioni ed hanno le seguenti caratteristiche:

- Massime prestazioni
- Massima stabilità dimensionale
- Massima stabilità del coefficiente d'attrito
- Ridottissima usura
- Massima modulabilità

BASE GOMMA BAGNO D'OLIO:

Prodotti con un materiale a base gomma per utilizzo a bagno d'olio, ottenuto utilizzando componenti di elevata stabilità termica e chimica, i dischi frizione ADIGE® sono perfetti per l'uso anche nelle condizioni più esasperate ed hanno le seguenti caratteristiche:

- Ottime prestazioni
- Ottima stabilità dimensionale
- Massima stabilità del coefficiente d'attrito
- Limitatissima usura
- Ottima modulabilità

SINTERIZZATO SECCO:

Prodotti con un materiale sinterizzato per utilizzo a secco, ottenuto da polveri metalliche nobili, di composizione e granulometria supercontrollata, i dischi frizione ADIGE® sono perfetti per l'uso nelle competizioni ed hanno le seguenti caratteristiche:

- Elevato coefficiente d'attrito
- Massime prestazioni
- Massima stabilità dimensionale
- Massima stabilità del coefficiente d'attrito
- Ridottissima usura
- Massima modulabilità

BASE GOMMA SECCO:

Prodotti con un materiale a base gomma per utilizzo a secco, ottenuti utilizzando componenti di elevatissima stabilità termica, chimica e dimensionale, i dischi frizione ADIGE® sono perfetti per l'uso anche nelle condizioni più esasperate ed hanno le seguenti caratteristiche:

- Elevato coefficiente d'attrito
- Ottime prestazioni
- Ottima stabilità dimensionale
- Massima stabilità del coefficiente d'attrito
- Limitatissima usura
- Ottima modulabilità

PAPER BASED WET CLUTCH:

Produced with a paper based friction material to be used in a wet clutch, ADIGE® paper based friction plates are produced with selected high-tech components with a very high thermal, chemical and dimensional stability. ADIGE® paper based friction plates are perfect for racing use and have the following features:

- *Maximum performance*
- *Maximum dimensional stability*
- *Maximum friction coefficient stability*
- *Very low wear*

RUBBER BASED WET CLUTCH:

Produced with a rubber based friction material to be used in a wet clutch, ADIGE® rubber based friction plates are produced with components with a really high thermal, chemical and dimensional stability ADIGE® rubber based friction plates are perfect for use even in the most demanding situations and have the following features:

- *Very good performance*
- *Very good dimensional stability*
- *Very good friction coefficient stability*
- *Very low wear*

SINTERED DRY CLUTCH:

Produced with a sintered material to be used in a dry clutch, ADIGE® sintered friction plates are produced with select high-tech metal powders of noble metals and with controlled granulometry. ADIGE® sintered friction plates are perfect for racing use and have the following features:

- *High friction coefficient*
- *Maximum performance*
- *Maximum dimensional stability*
- *Maximum friction coefficient stability*
- *Very low wear*

RUBBER BASED DRY CLUTCH:

Produced with a rubber based friction material to be used in a dry clutch, ADIGE® rubber based friction plates are produced with components with a very high thermal, chemical and dimensional stability. ADIGE® rubber based friction plates are perfect for use even in the most demanding situations and have the following features:

- *High friction coefficient*
- *Very good performance*
- *Very good dimensional stability*
- *Maximum friction coefficient stability*
- *Very low wear*

Frizioni Antisaltellamento APTC™

APTC™ è la frizione rivoluzionaria ed unica sul mercato ideata e brevettata da ADLER®. L'asservimento in coppia dell'APTC™ garantisce, oltre all'antisaltellamento in scalata, anche il massimo grip della ruota posteriore in fase di accelerazione, aiutando il pilota a mantenere il migliore assetto della moto e permettendo quindi una più rapida apertura del gas in uscita di curva.

Il mozzo dell'APTC™ realizzato in due parti connesse da un profilo elicoidale garantisce una leva frizione morbidissima (-50% del carico delle molle!) e nessuna pulsazione della leva in staccata. Il semplice set-up del pre-carico delle molle spingidisco con i distanziali in dotazione permette, inoltre, ad ogni pilota di trovare il setting personalizzato al proprio stile di guida, alle condizioni climatiche ed alle caratteristiche del tracciato.

Slippery Clutch APTC™

Revolutionary in design, unique to the market, the APTC™ slipper clutch is designed and patented by ADLER®. The power torque of the APTC™ slipper clutch assures the rider of both maximum rear-wheel grip during acceleration and anti-hopping during downshifting. By maximizing rider control, the APTC™ slipper clutch allows for greater speeds going into and coming out of turns.

The unique hub of the APTC™ consists of two parts connected by an helix profile. This design makes it much easier to pull the clutch lever (~50% less pressure is required!) and eliminates clutch lever vibration.

The simple set-up of the clutch springs pre-load with the three different types of included shims allows for greater customization possibilities by the rider.

VANTAGGI APTC™ RISPETTO ALLE NORMALI ANTISALTELLAMENTO:

- **ASSERVIMENTO IN COPPIA:**
la APTC™ agisce non solo in fase di frenata, ma anche in uscita di curva, in fase di accelerazione, permettendo una più rapida apertura del gas e garantendo maggiore trazione.
- **LEVA FRIZIONE MORBIDISSIMA:**
-50% del carico delle molle spingidisco rispetto alle frizioni standard di primo equipaggiamento
- **NESSUNA PULSAZIONE SULLA LEVA FRIZIONE:**
il funzionamento dell'APTC™ non viene percepito dal pilota sul manubrio.
- **FRIZIONE FORNITA DI DISCHI ED ASSEMBLATA:**
il tempo di montaggio della frizione sulla moto si riduce notevolmente.
- **DISTANZIALI DI SET UP FORNITI NEL KIT:**
l'APTC™ può essere regolata in base allo stile di guida del pilota o alle caratteristiche del tracciato semplicemente pre-caricando o scaricando le molle spingidisco con i distanziali in dotazione.

Per maggiori informazioni scarica il filmato su adigestore.com

Carter Frizione

Caratteristiche dei nuovi carter frizione ADIGE®:

- Realizzati con precisa lavorazione di macchina CNC da lega di alluminio T-6 anticorrosivo con alta resistenza agli agenti chimici
- Più resistenti degli originali, trattati con anodizzazione dura per una performance che duri a lungo nel tempo
- O-Ring in Viton per resistere anche alle più alte temperature
- "Channel Retainers" per una perfetta adesione dell'O-Ring al carter in modo da mantenere la frizione libera da sporco ed umidità
- Canali olio realizzati di lavorazione di macchina con imbuto direzionale per convogliare l'olio direttamente dove serve nella frizione ed aumentare la dissipazione del calore, preservando i dischi dall'usura precoce
- Loghi ADIGE® ed APTC™ realizzati di lavorazione di macchina

ADVANTAGES OF APTC™ COMPARED TO THE STANDARD SLIPPER CLUTCH:

- **POWER TORQUE:**
the APTC™ works: while downshifting, exiting a turn, during acceleration. This form of traction control allows for a far more rapid ascent to top speed.
- **SOFT-PULL CLUTCH LEVER:**
-50% less than standard clutch spring load.
- **NO CLUTCH LEVER VIBRATION:**
the rider will not be able to tell the APTC™ is working when he/she disengages the clutch.
- **CLUTCH IS FULLY ASSEMBLED WITH FRICTION PLATES:**
the only "assembly" required is the attaching of the clutch to the engine.
- **SETUP SHIMS ARE SUPPLIED:**
The rider can adjust the APTC to fit his/her riding style using the provided shims.

For more information download the video on adigestore.com

Clutch Covers

ADIGE® Clutch Cover features:

- Precision machined from T-6 billet anticorrosive aluminum with high resistance to chemical agents
- Stronger than stock, hard anodized for longer lasting performance
- Heat resistant Viton O-Ring with channel retainers for perfect seal to keep out dirt and moisture
- Special machined channels with extra-long directional funnel to direct oil back into clutch for better heat dissipation
- Precision machined ADIGE® & APTC™ logos

Le Frizioni Antisaltellamento APTC™ e i Carter Frizione sono ad uso agonistico sportivo per utilizzo esclusivo su pista. Slippery Clutch APTC™ and Clutch Covers are for racetrack use only; not for use on public road.

Pastiglie Freno

L'esperienza nel campo delle competizioni ha permesso ad ADIGE® di produrre pastiglie freno capaci di soddisfare le aspettative anche dei piloti più esigenti.

Pronte, potenti ed affidabili, le pastiglie freno ADIGE® sono disponibili in cinque mescole studiate per diversi impieghi, tutte accomunate da alto livello qualitativo e grande affidabilità. Tutte le pastiglie ADIGE® sono prive di amianto.

Brake Pads

The experience in the racing field allows ADIGE® to produce brake pads that satisfy the expectations even of the most demanding riders.

Prompt, powerful and reliable the ADIGE® brake pads are available in five different compounds, designed for different utilization but all with the same high quality level and reliability. All ADIGE® brake pads are asbestos free.

ACX (ORO) SINTERIZZATA:

Prodotte con una miscela sinterizzata adatta sia all'utilizzo in pista sia all'uso stradale, le pastiglie ADIGE®ACX si distinguono per una maggiore durata e resistenza alle alte temperature, garantendo una frenata potente e modulabile.

Caratteristiche:

- Miscela sinterizzata ad alto coefficiente d'attrito
- Frenata potente, costante e progressiva
- Senza effetto Fade
- Bassa rumorosità
- Alta efficienza sia sull'asciutto che sul bagnato
- Alte prestazioni sia alle alte che alle basse temperature
- Grande efficienza frenante su tutti i tipi di circuito
- Non aggressiva sul disco freno

Consigliate per:

Moto stradali di grossa cilindrata, SBK, cross e supermoto.

Disco Freno Consigliato: Acciaio

ACX (GOLD) SINTERED:

Produced with a sintered compound suitable both for the racing use and for the street use, the ADIGE®ACX brake pads stand out for a longer life and resistance to high temperatures, assuring a powerful braking that can be perfectly modulated.

Features:

- *Sintered compound with high friction coefficient*
- *Powerful, unchanging and graduated braking*
- *Without Fade effect*
- *Low noise*
- *High efficiency both on dry and wet surfaces*
- *High performance at both high and low temperatures*
- *High braking efficiency on all kind of racetracks*
- *Low wear of the brake disc*

Suggested for:

big displacement motorcycles, SBK, motocross and supermoto bikes.

Suggested brake disc: steel brake discs.

ASX (NERA) ORGANICA STRADALE:

Tutte le pastiglie ADIGE della gamma scooter ASX sono prive di amianto e certificate KBA e ISO 9001:2000. Prodotte con una miscela semi-metallica, le pastiglie ADIGE®ASX hanno le seguenti caratteristiche:

- Componenti semi-metallici
- Frenata progressiva e modulabile
- Senza effetto Fade
- Bassa rumorosità
- Minima perdita di efficacia sul bagnato
- Non aggressiva sul disco freno

Consigliate per: Scooter, Moto stradali di piccola cilindrata e ATV

Disco Freno Consigliato: Acciaio e Ghisa

ASX (BLACK) ROAD ORGANIC:

All ADIGE ASX scooter brake pads are asbestos free and certified KBA e ISO 9001:2000. Produced with a organic compound, the ADIGE®ASX brake pads have the following features:

- *Organic compound*
- *Unchanging and graduated braking*
- *Without Fade effect*
- *Low noise*
- *Very low loss of effectiveness on wet terrains*
- *Low wear of the brake disc*

Suggested for: Scooter, small displacement motorcycles and ATV

Suggested Brake Disc: Steel and cast-iron brake discs

ATX (ROSSA) ORGANICA TRIAL:

Prodotte con una miscela semi-metallica e studiate specificatamente per l'utilizzo nel trial, le pastiglie ADIGE®ATX hanno le seguenti caratteristiche:

- Componenti semi-metallici
- Frenata progressiva e modulabile
- Senza effetto Fade
- Bassa rumorosità
- Non aggressiva sul disco

Consigliate per: Moto da Trial

Disco Freno Consigliato: Acciaio e Ghisa

ATX TRIAL SEMI-METALLIC:

Produced with a semi-metallic compound and specifically designed for the trial use, the ADIGE®ATX brake pads have the following features:

- *Semi-metallic compound*
- *Unchanging and graduated braking*
- *Without Fade effect*
- *Low noise*
- *Low wear of the brake disc*

Suggested for: Trial motorcycles

Suggested Brake Disc: Steel and cast-iron brake discs

Ganasce Freno

L'affermata tradizione nel settore dei materiali di attrito si riflette in una gamma di ganasce freno che consente di coprire i modelli di scooter e ciclomotori più diffusi. La perfetta compatibilità con il prodotto originale rende le ganasce ADIGE® un'ottima scelta. Tutte le ganasce ADIGE® sono prive di amianto.

STANDARD - ORGANICA STRADALE:

Prodotte con una miscela organica senza amianto, le ganasce ADIGE® garantiscono un perfetto equilibrio di frenata.

Caratteristiche:

- Componenti organici senza amianto
- Bassa usura
- Bassa rumorosità

Consigliate per: Scooter, ciclomotori e moto d'epoca.

Brake Shoes

The established tradition in the compound field is reflected in a brake shoe range that covers even the most obscure scooter, moped and vintage motorcycle. Perfect compatibility with the original product make ADIGE® brake shoes the perfect choice for every bike. All ADIGE® brake shoes are asbestos free.

STANDARD - ORGANIC FOR STREET USE:

Produced with a organic asbestos free compound, ADIGE® brake shoes assure a perfect balance during the application of brakes.

Features:

- Rubber based - asbestos free compound
- Low wear
- Low noise

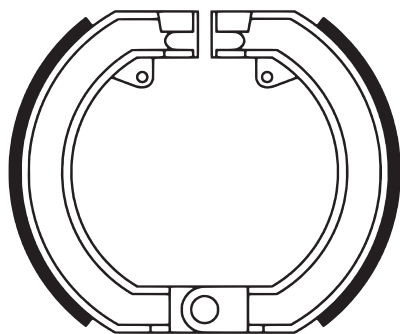

Suggested for: Scooters, mopeds and vintage motorcycles

Dischi Freno

I dischi freno ADIGE® sono realizzati in uno speciale acciaio inox ad alto contenuto di carbonio e realizzati da taglio laser. Garantiscono una frenata potente, grande resistenza all'usura ed elevata sicurezza. Tutte le superfici non lavorate vengono verniciate in cataforesi nera per prevenire qualsiasi innesco di ossidazione. Studiati e progettati per un uso specifico su scooter e maxi-scooter i dischi freno ADIGE® sono perfettamente compatibili con il prodotto originale.

Brake Discs

ADIGE® brake discs are laser cut from sheets of special stainless steel with a high percentage of carbon. The discs assure a powerful braking process, high resistance to wear and high safety. All the surfaces that are not machined are painted in black cataphoresis to prevent every oxidation trigger. The discs are designed and developed for specific use on scooters and maxi-scooters. The ADIGE® brake discs are perfectly compatible with the stock brake discs.

TONDO – FISSO:

Caratteristiche:

- Disco in acciaio ad alto contenuto di carbonio
- Pista frenante forata
- Peso contenuto
- Perfettamente sostituibile all'originale

ROUND – FIX:

Features:

- *Stainless steel with high content of carbon*
- *External track with holes*
- *Low weight*
- *Perfectly interchangeable with the stock brake disc*

WAVE™ – FLOTTANTE:

Caratteristiche:

- Disco in acciaio ad alto contenuto di carbonio
- Forte grip iniziale con buona modulabilità
- Appoggio costante su tre punti, con usura parallela della pastiglia
- Superficie periferica superiore con una maggiore dissipazione del calore
- Minor tendenza alle deformazioni
- Minor peso
- Perfettamente sostituibile all'originale

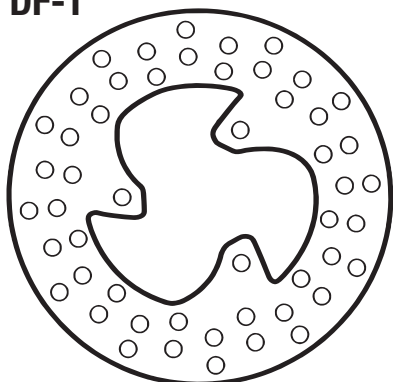

WAVE™ – FLOATING:

Features:

- *Stainless steel with high content of carbon*
- *External track with non-round profile*
- *High initial grip that can be modulated*
- *Uniform three point support, resulting in a parallel wear of the brake pads*
- *Bigger peripheral surface for a better heat dissipation*
- *Lower deformation*
- *Lower weight*
- *Perfectly interchangeable with the stock brake disc*

Lamelle

Dimensionate in modo specifico per incrementare le prestazioni dei motori a due tempi, sono prodotte in diversi materiali ed in vari spessori per soddisfare tutte le esigenze.

La scelta dello spessore e del materiale della lamella permettono di variare la forma della curva di potenza per ottenere il rendimento migliore.

Reeds

Specifically designed to improve the performances of the 2-stroke engines, ADIGE® reeds are produced in 3 different materials and various thicknesses to satisfy all riders' requirements.

The choice of the thickness and material of the reeds allow the changing of the power curve to get the best engine efficiency.

ACCIAIO INOX:

per la sostituzione della lamella originale per chi non richiede un incremento di prestazioni; disponibili negli spessori: 0,15 – 0,20mm.

STAINLESS STEEL:

for the replacement of the original reeds, without increase of performances; available in the following thicknesses: 0.15 – 0.20mm.

FIBRA DI VETRO:

Le lamelle in fibra di vetro ADIGE® sono realizzate in uno speciale composto "fail-safe", che garantisce una maggiore durata rispetto all'originale. Le lamelle ADIGE® in fibra di vetro sono disponibili, in base alle applicazioni, negli spessori:
0,20 – 0,25 – 0,30 – 0,35
0,40 – 0,45 – 0,50 – 0,55
0,60 – 0,65 mm.

GLASS FIBER:

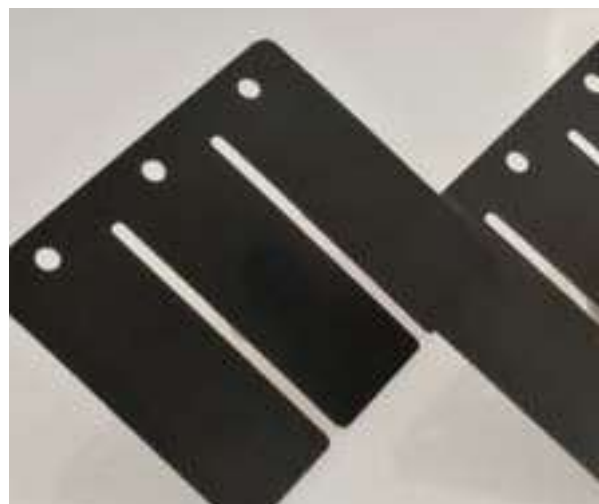

ADIGE® glass fiber reeds are produced in a special "fail-safe" material, to guarantee a better reed life compared with the stock ones. The ADIGE® glass fiber reeds are available, for the various applications, in the following thicknesses:
0.20 – 0.25 – 0.30 – 0.35
0.40 – 0.45 – 0.50 – 0.55
0.60 – 0.65mm.

FIBRA DI CARBONIO:

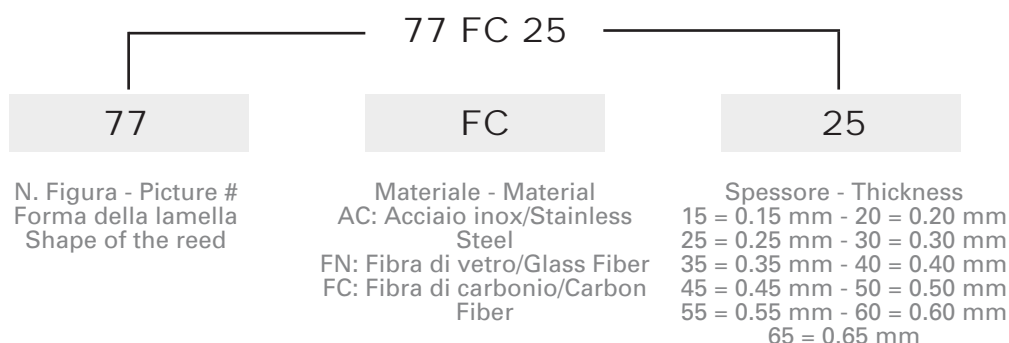

Le lamelle in fibra di carbonio ADIGE®, grazie alla alta flessibilità del materiale, consentono una maggiore apertura della lamella, garantendo un aumento delle prestazioni agli alti regimi migliorando il rendimento del motore. Le lamelle ADIGE® in fibra di carbonio sono disponibili negli spessori:
0,20 – 0,25 – 0,30 – 0,35
0,40 – 0,45 – 0,50 mm.

CARBON FIBER:

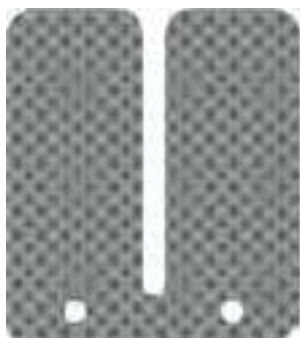

The ADIGE® carbon fiber reeds, thanks to the high quality and high flexibility of the material, allow a bigger opening of the reeds, increasing the engine performances at high RPM and improving the engine efficiency. The Carbon Fiber Reeds are available in the following thicknesses:
0.20 – 0.25 – 0.30 – 0.35
0.40 – 0.45 – 0.50mm.

Valvole Lamellari

Le valvole lamellari hanno lo scopo di regolare ed ottimizzare il flusso della miscela in fase di aspirazione al fine di migliorare l'erogazione a tutti i regimi. Le valvole lamellari ADIGE®, scelte come primo equipaggiamento dalle più prestigiose Case motociclistiche, hanno il corpo valvola realizzato in materiale termoplastico o in alluminio trattato sul quale viene vulcanizzata una speciale miscela a base gomma (in FPM, NBR od ECO) inattaccabile da benzine ed ozono. Sono disponibili in versione standard o nelle versioni racing "Air Bag" e "Power-Reed Valve".

Reed Valves

Reed valves are used to regulate and optimize the gas flow during the intake phase, to improve the distribution at every speed and RPM. ADIGE® reed valves, used by the most important motorcycle companies, are produced using an aluminum or thermoplastic base covered by a vulcanized special rubber based compound (FPM, NBR or ECO), gas and ozone proof. ADIGE® reed valves are available for the most common 2-stroke engines in a standard version or in the following racing versions: "Air Bag" and "Power-Reed Valve".

AIR BAG:

La valvola lamellare ADIGE® "Air-Bag", specificatamente studiata per il motore Minarelli orizzontale, è dotata di un rivoluzionario sistema che ammortizza pneumaticamente l'apertura delle lamelle in aspirazione; si ottimizza così il sincronismo in funzione del rendimento e si migliora l'erogazione rendendola fluida e costante.

AIR BAG:

The ADIGE® "Air-Bag" Reed Valve, specifically designed for the Minarelli horizontal engine, is produced with a revolutionary system that pneumatically cushions the opening of the reeds during the intake phase; in this way the synchronism is optimized for the required performance, improving the gas flow.

VALVOLE POWER-REED:

La valvola lamellare regolabile ADIGE® "Power-Reed Valve", specificatamente studiata per l'applicazione sui motori 125cc a 2 tempi, consente, grazie alla particolare geometria della lamella, una completa regolazione da parte del pilota del flusso della miscela aria-benzina nel motore, variando la curva di potenza della moto ed adattandola alle caratteristiche del pilota e del tracciato.

Il suo utilizzo comporta i seguenti miglioramenti:

- Aumento della coppia motrice conseguente ad un miglior funzionamento del carter-pompa
- Spostamento del punto di potenza massima verso regimi più alti per un maggior allungo
- La scelta dello spessore, del materiale e della taratura della lamella permettono di variare la forma della curva di potenza per ottenere il rendimento migliore verso i medi o gli alti regimi.

POWER-REED VALVES:

The adjustable ADIGE® "Power-Reed Valve", specifically designed for the application on the most powerful 2-stroke engines, allow the rider, thanks to the special structure of the reeds, to control completely the gas-air flow into the engine, changing the power curve of the bike and adapting it to the rider's and track's peculiarities. The use of the ADIGE® "Power-Reed Valve" creates the following improvements:

- Increase of torque, due to the better functioning of the crankshaft-pump
- Shift of the maximum power point to higher RPM, getting a better utilization of the engine
- The choice of the thickness and material of the reeds and the set-up of the reed itself allow the changing of the power curve to get the best engine efficiency at medium or high RPMs.

Collettori d'aspirazione

La speciale tecnologia sviluppata da ADIGE® per lo stampaggio della gomma sul metallo ha portato ADIGE® a proporre sul mercato soluzioni fortemente innovative per l'applicazione a prodotti come i collettori d'aspirazione.

I collettori ADIGE®, sviluppati in collaborazione con le più prestigiose Case motociclistiche internazionali e studiati in relazione alle esigenze funzionali del motore ed agli ingombri di telaio e carrozzeria, presentano una struttura composita in quanto vengono prodotti partendo da un inserto in lega d'alluminio sul quale viene vulcanizzata una speciale miscela a base gomma (in FPM, NBR od ECO) inattaccabile da benzine ed ozono.

In questo modo vengono garantite sia una notevole rigidità della base di fissaggio al carter sia una buona elasticità del corpo del collettore.

Intake Manifolds

The special technology developed by ADIGE® for the vulcanization of the rubber on to aluminum enabled ADIGE® to introduce innovative solutions for products like intake manifolds to the market.

The ADIGE® intake manifolds are developed in cooperation with the most important motorcycle manufacturers and designed to meet the functional engine requirements and the overall frame dimensions, consist of an aluminum flange integrated with a special rubber covering (in FPM, NBR or ECO) making them gas and ozone proof.

In this way, both an outstanding rigidity of the crankshaft coupling and good flexibility of the intake manifold body are guaranteed.

Fermacopertoni

I fermacopertoni ADIGE®, studiati in collaborazione con i Reparti Corse delle più prestigiose Case motociclistiche, sono realizzati con la tecnologia sviluppata da ADIGE® per lo stampaggio della gomma sul metallo.

Il totale rivestimento dell'inserto di alluminio con una speciale miscela a base gomma evita il danneggiamento e lo slittamento del pneumatico sul cerchio. Costruiti con materiali di prima qualità i fermacopertoni ADIGE® rappresentano la giusta scelta per ottenere i migliori risultati.

Dimensioni disponibili:

Ruota Anteriore:

1,60" – 1,85"

Ruota Posteriore:

2,15" – 2,50"

Tire Locks

ADIGE® has used their many years of experience in the field of off-road racing to develop a line of tire locks produced with the special technology developed by ADIGE® for the vulcanization of the rubber on the aluminum.

The ADIGE® tire locks are completely covered with a special rubber that prevent tire damage and eliminate the problem of tires slipping on the rim.

The locks are so effective that they have become the primary choice of many of the world's leading motorcycle manufactures.

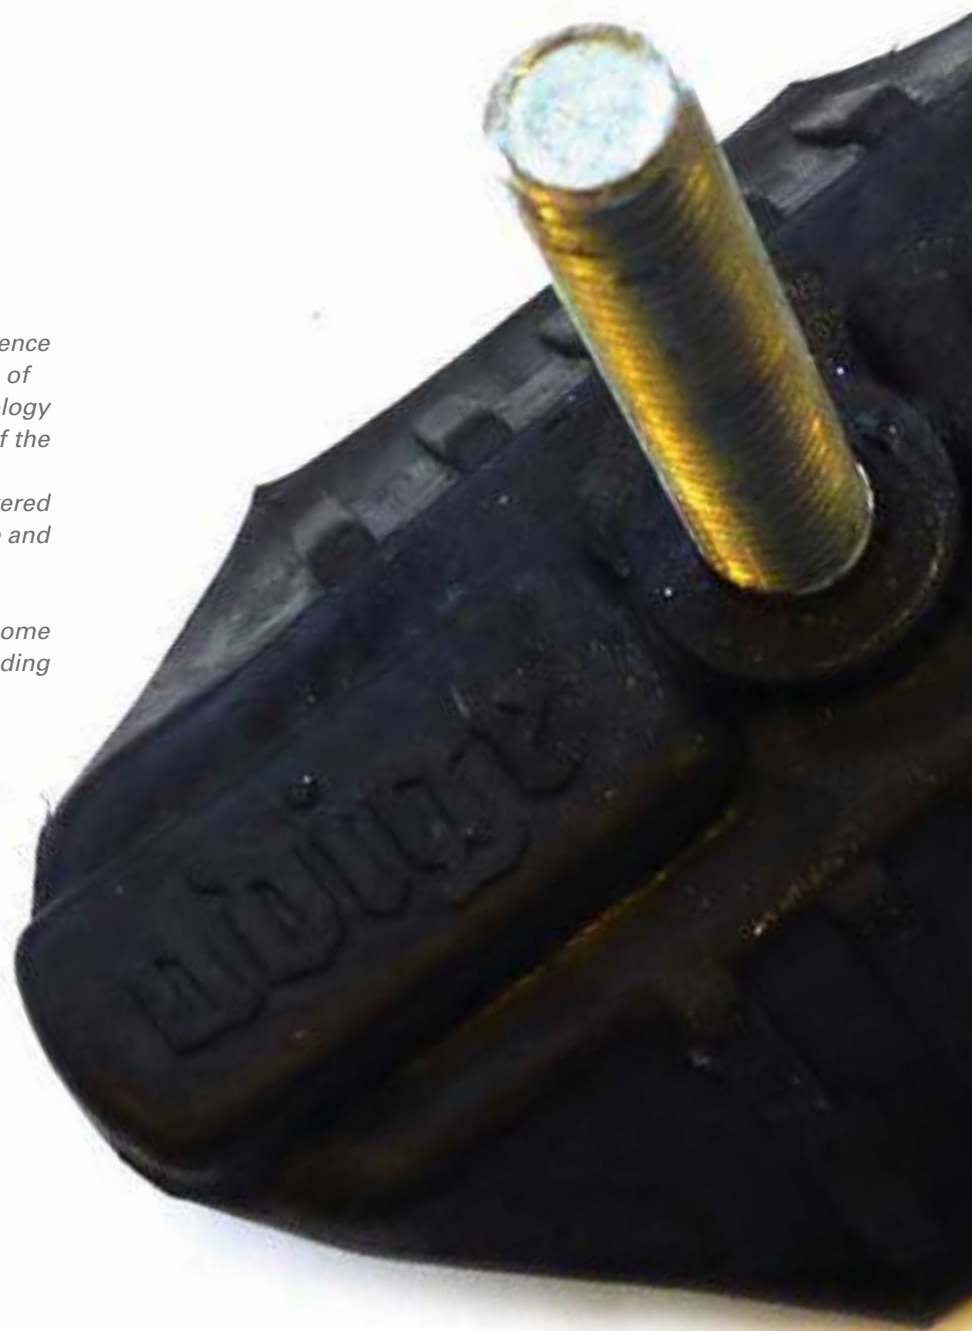

Available dimensions:

Front tire:

1.60" – 1.85"

Rear tire:

2.15" – 2.50"
