

## TUBI FRENO IN TRECCIA DI ALTA QUALITÀ

HEL Performance è un'azienda inglese specializzata nella realizzazione di tubi freno e frizione in treccia ad alta performance.

Prima azienda al mondo ad applicare un **rivestimento in PVC** alla guaina per proteggere il tubo, rendendolo estremamente resistente e disponibile in tante colorazioni differenti, da sempre HEL Performance si propone di realizzare esclusivamente prodotti di altissima qualità, utilizzando unicamente leghe e metalli raffinati quali il titanio e l'acciaio Inox, garantendo un **prodotto di qualità superiore** per durata e prestazioni.

In virtù della stretta collaborazione iniziata nel 2017 tra Forbikes Srl e HEL Performance, Forbikes può oggi offrire tempistiche di preparazione e consegna dei kit particolarmente celeri e la possibilità di realizzare kit **tubi personalizzati**. I tubi su misura vengono realizzati direttamente da Forbikes, nello stabilimento di Reggio Emilia, seguendo le indicazioni fornite dal cliente riguardo la lunghezza delle varie linee freno e la loro quantità. L'utente finale potrà scegliere e personalizzare anche il tipo di raccordo e la bulloneria, ottenendo dei tubi freno completamente su misura e in grado di coniugare affidabilità ed alte prestazioni. Richiedere la modulistica via mail a [commerciale@forbikes.it](mailto:commerciale@forbikes.it).

Tra le ultime novità del brand inglese, disponibili le pinze freno anteriori radiali, le pinze freno posteriori assiali, le pompe pollice e le pompe indice.
