B-LED INDICATORS

N1001/BB | Powered by LED system | Optical Lens | E-Marked | Universal | Pair

Exclusive Design by BARRACUDA®

TECHNICAL INFO

B-LED is an universal Led insert E-marked indicator.

It has a perfect fixing on BARRACUDA B-LUX ANTIVIBRATION but it can also used as insert on any another support such as fairing or chassis.

B-LED are made in aluminum body, powered by led system, use last generation optical lens, sold in pair.

M-LED INDICATORS

N1001/BM | Aluminum | Powered by LED system | Optical Lens | E-Marked | Universal | Pair

Exclusive Design by BARRACUDA®

TECHNICAL INFO

M-LED B-LUX are Universal E-Marked indicators made of Aluminum, which use the latest generation LED technology with optical lens.

They are characterized by hyper-essential lines and have minimal dimensions.

They are part of the B-LUX range (BARRACUDA LUXURY PROJECT), representing the TOP of the RANGE offered by BARRACUDA. Available in BLACK satin finish. Design signed BARRACUDA.

BARRACUDA | B-LUX

SQ-LED INDICATORS

N1001/BSQ | Aluminum | Sequential LED system | E-Marked | Universal | Pair

Exclusive Design by BARRACUDA®

TECHNICAL INFO

SQ-LED B-LUX are E-marked universal indicator in aluminum that use the LED technology, optical lens and SEQUENTIAL flashing. They have iper-aerodynamic lines and futuristic style. SQ-LED B-LUX are a part of the B-LUX (BARRACUDA LUXURY PROJECT) range that represent the TOP RANGE by BARRACUDA. Available in six anodized colors.

MICRO TIGER LED

N1002-MTL | Aluminum | Powered by LED system | E-Marked | Universal

Exclusive Design by BARRACUDA®

TECHNICAL INFO

The MICRO TIGER LED rear spotlight is universal and E-Marked, it is made of CNC aluminum, it uses the latest generation LED technology with optical lens. Available with black body and transparent lens. It has a special design signed BARRACUDA.

- N.B. The spotlight is universal, it is not specific for any motorcycle, check for possible compatibility.

BARRACUDA | B-LUX

FOOT PEG

NF123 | Aluminum CNC | Universal | Pair | Specific model brackets

Exclusive Design by BARRACUDA®

TECHNICAL INFO

BARRACUDA FOOTPEG are in Aluminum with anodized CNC in SILVER and BLACK colors. They have an exclusive design but also excellent ergonomics for better foot support while driving.

The FOOTPEG KIT have specific attachments for the different models (see the attached list). There are also available as an option, to be purchased separately, 5 COLORED INSERTS RINGS (silver, red, blue, green and gold) to characterize the design of the bike.

SKIN-X BAR-END B-LUX

N2000-SXB | Aluminum | E-Marked | Universal | Pair

Exclusive Design by BARRACUDA®

TECHNICAL INFO

TECHNICAL INFO

BARRACUDA's LED INDICATORS are universal and compatible for most motorcycles. Each motorbike has a specific system therefore may requires resistors:

- motorbikes with 10 watt system need 10 WATT RESISTOR to adjust the flash rate;
- motorbikes with 21 watt system need 21 WATT RESISTOR to adjust the flash rate;
- motorbikes with original LED system don't need inline resistors;

These will cover 99% of motorbikes on the market, but there are also special motorbikes that have different technical features and they will need specific electrical adapters to be evaluated case by case and need professional technical support about the functioning.

For the BEST INSTALLATION we advise to buy:

- Indicator Spacer Plate Brackets for the fixing the indicators neatly;
- Indicator cables for the connection of indicators to the original system without making changes or cuts to the original cables or connectors are also available on our official web.
