STATE OF THE ART QUALITY

MIW oil filters are produced with a vision to provide the highest standards required by modern motorcycles. Our chosen method of filtration is **resin impregnated micropore paper**. Using a high grade cotton linter fibre, to give unparalleled durability during filtration.

The cotton linter element composes of fibre strands, with differing thicknesses. With thicker strands on the outer wall of the filter, to catch larger metallic particles and thinner strands making up the inner wall, catching even the smallest particles.

The multi strand microscopic fibers provide superb porosity for oil flow, even after contamination.
